- 1.1 About
  - 1.2 System features
  - 1.3 Points of interest
- 2.1 Abilities
  - 2.2 Compatibility
- 3.1 Packages

## 1.1 About:

This system was designed for ease of use, public awareness of critical information, **real-time** data, and to be invaluable resource to its viewing audience.

## 1.2 System features:

This system has many feature as listed below

**Streaming Data:** Show your viewers critical information to save them time, and you valuable resources. Present data for example, closed or canceled events, calendar events, etc.

**Trivia:** Quiz your viewers about a wide variety of questions and topics (built in), add your own, or have a custom database made.

**Weather:** Have weather displayed for a certain area in real-time (this is subject to change, either by internet connection availability, or public sources available, usually comes from a local tv station)

**Slide show:** Insert pictures with ease and display them on the show.

**Door prize connection:** From setup computers, answer easy questions to be entered into a database for random drawings (random numbers X is drawn when told to run). Use this to better inform your guests about what you have to offer as well as giving them prizes.

**Web Poll:** Present question on your show, cast your vote on a touch screen voting booth, and see the results real-time on the show!

## 2.2 Compatibility:

For best results have a powerful server (1 gigahertz) and 1-5 voting or questionnaire booths (touch screen). To present the show, a projector, plasma screen, or closed circuit television is optimal.

### 3.1 Packages:

The standard package includes the following:

News scroller  
Trivia  
Weather  
Slideshow

Additions packages available are:

Web poll  
Door Prize Connection

All of these products integrate seamlessly and make a wonderful Public Broadcasting System.

If a product is not listed here, they can be designed and customized for your use.
